

SignalWire

Software-Defined Telecom

Who We Are

A technology company dedicated to bringing **Software-Defined Telecom** to the mainstream

An Always-On **Distributed Team** in 15 states and 11 countries.

The creators and stewards of the **Most Popular and Powerful** open-source telecom platform in the world.

Pioneers, developers and thought leaders at the intersection of **Internet Communication** and **Remote Work** / collaboration tools.

Create a Software-Defined Telecom Network

- Accelerate the **Digital Transformation** of telecom infrastructure.
- Eliminate the **Barrier to Entry** for the next generation of communications products.
- Terraform a **New Digital Landscape** for communications on the web.

15 Years of Innovation

- 17 Companies using **SignalWire's FreeSWITCH Tech** in the same trade show.
- Without our **Innovation** the industry would be not be possible.
- All **Major Communications Categories.**
- They **rely on us** for core innovations.

Software-Defined Telecom network eliminates the need for on-prem communications.

Our underlying platform is **infinitely flexible** allowing rapid development of new products and services.

Our **core technology** is world-class and has already laid the groundwork for the digital age of communications.

WE BUILT OUR OWN TECHNOLOGY SO THERE ARE NO SOFTWARE COSTS OR DEPENDENCIES

Classic Telecom APIs

Modern real-time APIs

Embeddable Video APIs

All combine to connect
the world

Expensive Datacenters

Cisco 4451-X Integrated Services Router Voice and Video Bundle Router - Modular - Gigabit Ethernet

\$15,806.77 [POSGlobal.com](#) **91% positive** (1,747) | [Compare prices from 10+ stores](#)

★★★★★ 1 product review

The **Cisco 4451-X** Integrated Services Router revolutionizes the delivery of application aware services in a branch-office ...
Cisco · ISR · Wired · Gigabit Ethernet · IPv6 Compatible · 32 GB

Expensive Equipment (Cisco, Sonus etc)

Expensive Administrative Staff

Little-To-No programmability

Backwards Facing Focus

1970s call quality

20-Year-Old API technology

Deflation of costs **creating a bubble**

SignalWire

Historic Timeline

Gen 1 - On-Prem physical devices on a wired network.

Gen 2 - Gateway physical phone network to IP with REST APIs.

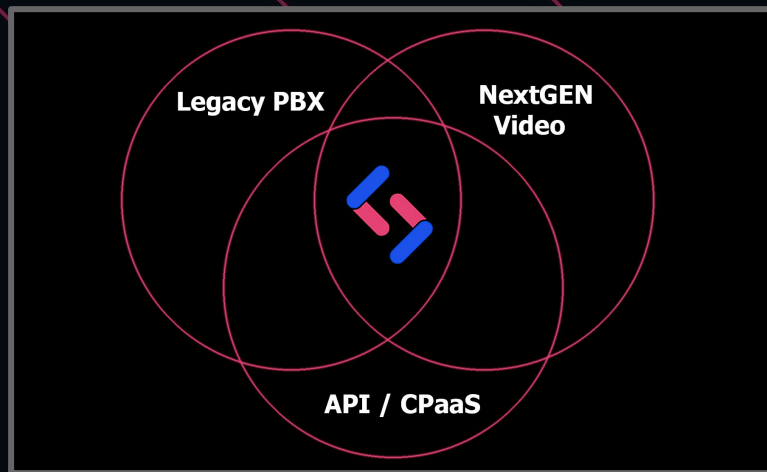

Gen 3 - Build a **Software-Defined Telecom** network that can **Interconnect** the past, present and future, globally.

Gen 4 - **Leverage the Network** to get in the **Communications Path** of all internet-enabled devices and enable a **New Category** of market verticals.

Three pillars of the future of communications

- 1) **Elevate Video** beyond stuffy meetings and into real-life use.
- 2) **Elevate dusty PBX** concepts to change how we communicate.
- 3) **Tie it all together** with simple programming interfaces.

5G will extend **Unprecedented Bandwidth** at low latency to billions of devices.

We are at a **Massive Inflection Point** with regards to digital communication and there is an opportunity to fundamentally change the landscape.

Accelerating to critical mass is key to dominance.

Our **Distributed Team Model** can allow us to **Innovate** while **Moving Quickly** while others are forced to adapt to a work-from-home culture shock.

42% of the global IT market (**\$1.5 Trillion**) is spent on digital communications services.

According to IDC, the Global CPaaS Market is projected to grow to **~\$11BN** in 2022.

Unified Communications market: **\$14 Billion.**

US alone: **348 Billion** minutes of over-the-top VoIP calls & **180 Billion** app-to-person messages.

45% of the global IT market (**\$1.5TR**) is currently (2019) spent on digital communication services, which according to Gartner is still majority on-prem technology.

Unfair Advantage

SignalWire has pioneered **Software-Defined Telecom** since the inception of its core technology stack **FreeSWITCH** was created in 2006.

The **Community of Millions** helps provide invaluable insight into the way communication is done and cannot be reproduced by others.

Our technology can scale to **Maximize the Resources** of any compute device virtual or bare metal.

Our ability to rapidly identify and **Deploy Valuable Functionality** is unprecedented.

SignalWire Team

Founders

Sean Heiney, COO

**Experienced Product Leader
and GTM Executive**

Barracuda, Periscan

Anthony Minessale, CEO

**Technical Founder
Creator of FreeSWITCH**

**Barracuda, FreeSWITCH
Solutions**

Evan McGee, CTO

**Expert in Microservices and
Cloud Architects**

RingPlus (MVNO)

SignalWire Team

Leadership

Nigel Thomas, VP Sales

Experienced Sales Leader from
Redhat and Inktank

Aseem Asthana, VP Product

10 years PM experience with
Barracuda Networks

**Ezra Hookano, VP Business
Development**

Extensive company building -
Barracuda, Fusion-io, Exablox

SignalWire

Software-Defined Telecom

Customers - Service Titan

ServiceTitan

Initial project saved tens of thousands of dollars by switching from Twilio.

Able to maintain their own carrier relationship.

Future projects will open more doors to grow together.

Customers - RoboKiller / IAC

Provide backend infrastructure for their mobile app.

Tested and ready to ramp up to enormous volume of millions of minutes a day.

Several other IAC brands need services.

Customers - Cerner

Provide secure Software-Defined Telecom STACK for medical application.

Opportunity to provide to other services as they are developed.

Priced to grow on per-user model.

Customers - Home Depot

Connect AI Auto Attendant to Google Cloud.

Deployed private-cloud application to thousands of stores.

Endless opportunity to reduce more of their complexity with new services.

Customers - Liberty Mutual

Preserve the buzz of the trading floor.

Create a virtual office experience for their employees.

Pave the way forward for a new era of communications and remote work.
